

Joint Postgraduate Programme in Information Technology Management

Offered by U21Global and IGNOU

Your future demands more than just
technical know-how.

Do you have what it takes?

Today, beyond doubt, the most popular educational programmes remain IT and business related. Specialisation is the key among graduate online programmes. IT professionals these days need to equip themselves with more than just technical know-how. Ability to make both strategic and management-related decisions is just as important.

To empower you with the appropriate tools to take up new challenges, U21Global and IGNOU have collaborated to offer the joint Postgraduate Programme in Information Technology Management. Instilling a sense of encouragement, this acquired knowledge will give you a cutting-edge in the IT domain.

Course Schedule

The 18-month programme will be conducted via distance learning. The first 9 modules from U21Global will be delivered online with discussion forums, team case studies as well as individual projects. The 6 subjects from IGNOU will be conducted via distance learning formats which includes multimedia approach comprises print, audio-visual materials, counseling sessions and interactive radio counseling.

U21Global's partner universities

- The University of Birmingham
- The University of Melbourne
- The University of Nottingham
- The University of Virginia

Universitas 21 Global (U21Global), the premier global graduate school providing online postgraduate management programmes for working executives and professionals, has a strong team of international faculty to address every level of your education needs. In close collaboration and partnership with four prestigious universities from around the world, U21Global combines the traditional quality of its founders and partners with innovative modes of delivery using the Internet. It has students from over 72 countries, making the learning experience a truly global one.

Indira Gandhi National Open University (IGNOU), with international recognition and presence, is a centre for Open Distance Learning. Over the last 25 years, IGNOU has established itself as a national resource centre and provider of quality education at par with other national and international institutions of higher learning. With focus on sustainable and learner-centric quality education, IGNOU is backed by methodologies and innovative technology to support learning. Committed to quality in all its activities like teaching, research, training and extension, IGNOU has set for itself indicators and evaluation systems of excellent standards. With expertise available in every sphere of learning, IGNOU maintains high academic standards to compete with the fast changing global environment of educational services.

Joint Postgraduate Programme in Information Technology Management

The joint programme is not about developing your technical skills. It is designed to equip you with technology and information management skills, the kind of skills you will need to move beyond purely technical positions into management positions.

Whether you are a business professional working in a technology environment or an IT professional looking to move up the career ladder, you will find that this programme provides immense learning and development opportunities.

Why This Programme?

Dual-qualification

After successful completion of the programme, students will receive two certificates, one from IGNOU and one from U21Global which bears the crests of the four partner universities.

Best Practices

Global-focused programme to equip the IT professionals with management skills, competence and knowledge for the evolving industry.

Flexibility

Both institutions being the leader in distance and online education, you have full flexibility to balance your work, life and study.

Networking

In addition to the IGNOU alumni, you will also be part of U21Global global community where you can network with executives and professionals from around the world.
